CHOOSING YOUR KITCHEN

EXPERT ADVICE ON COMBINING STYLE WITH PRACTICALITY.

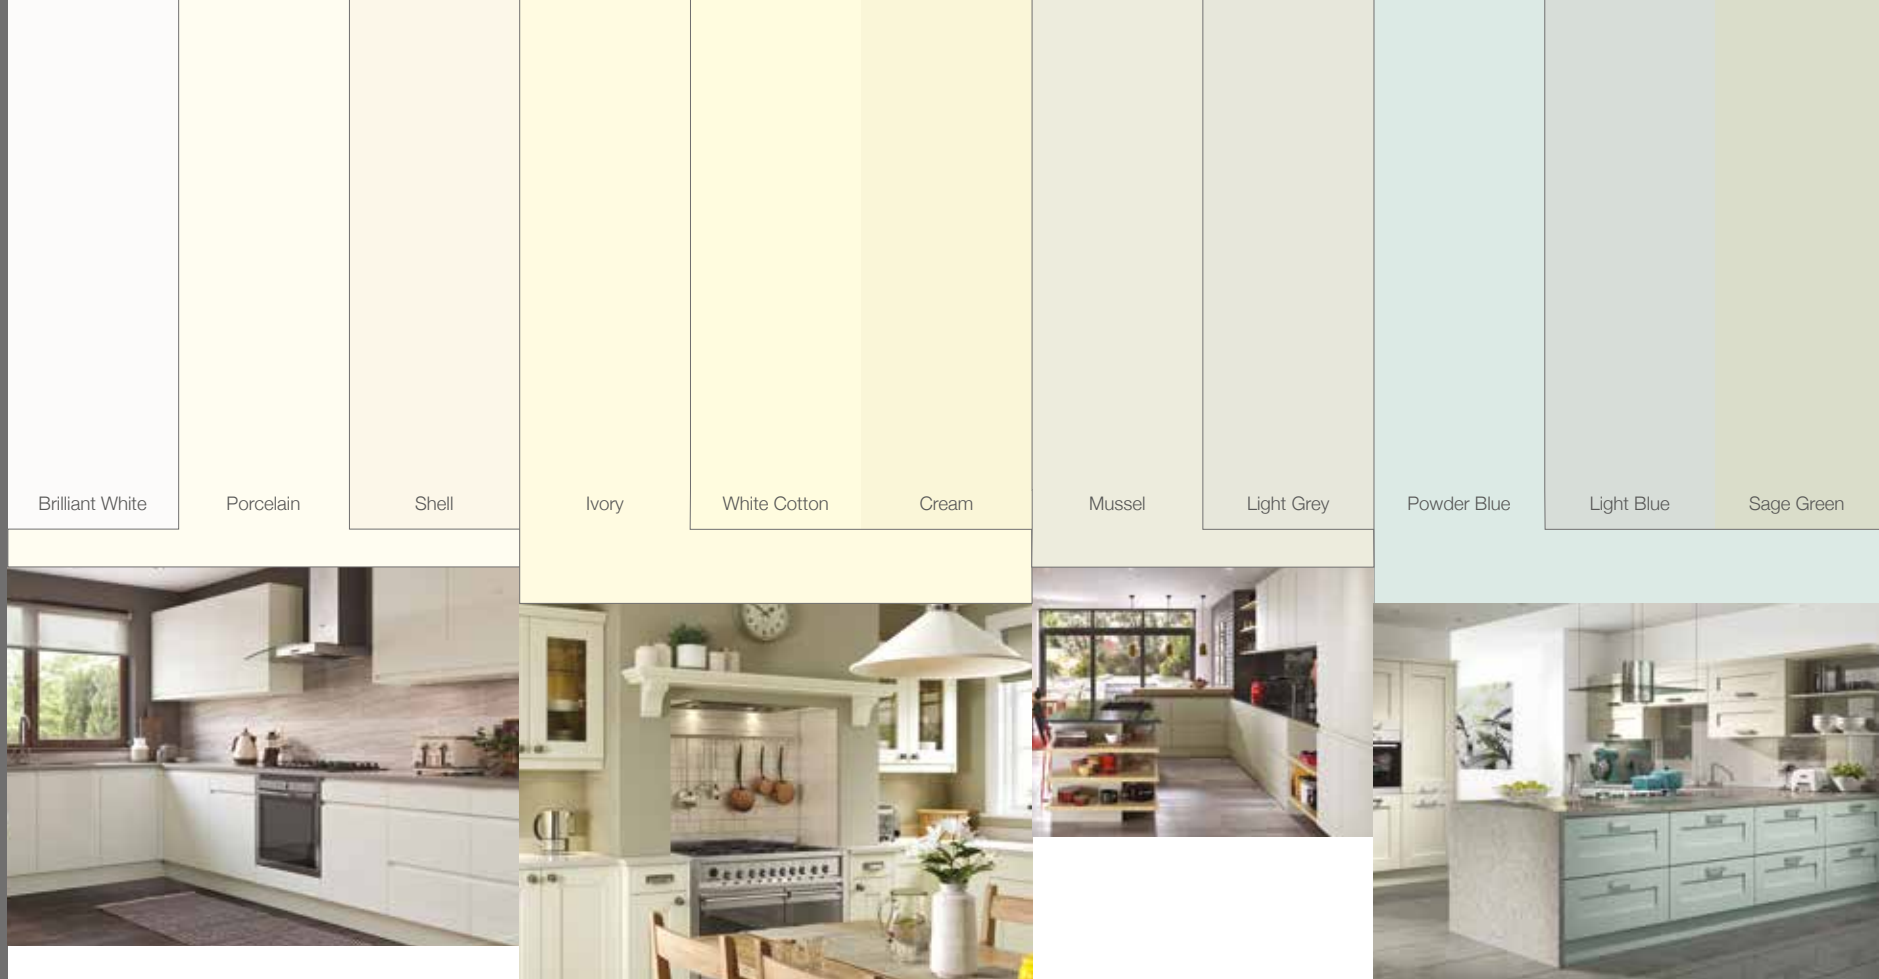

Your new kitchen is an important investment that should be carefully considered, so engaging the skills of an experienced kitchen designer will ensure that you get it exactly right. Balancing your desired look and style with a functional design layout will result in a space that is efficient as well as aesthetically attractive. From maximising storage with a view to increasing capacity to deciding on feature focal points such as islands, overmantles and appliances, your kitchen designer will help you make the most of your space, regardless of size.

VERSATILITY IS KEY.

Our ranges present you with an abundance of stunning style options from modern contemporary to traditional classic. This provides the versatility you need to create your own unique space and, more specifically, a room that will perfectly fit your home's personality as well as your lifestyle. Whether it's a chic, modern look you're after or a more cosy, traditional feel, our range of mix and match colours, finishes and accessories will allow you to achieve your dream kitchen, tailored to your individual taste. Rich and vibrant or muted gloss colours fused with a variety of wood grains or painted finishes will give your kitchen its own style, a place that you can be proud of and enjoy.

With so many options available it can be challenging to decide on what you really want to achieve from your kitchen. From the overall style to the more practical elements of design, layout and even appliances, one thing's for sure, you'll want your kitchen to be both fabulous and functional.

CHOOSE A COLOUR, ANY COLOUR!

Have you seen the perfect paint colour for your kitchen that you simply must have? If so, our Colour Matching Service will match it for you.

Simply provide a RAL (European Standard) or BS (British Standard) paint colour and we will match it, true to your specifications.

Please note: Does not apply to Florence, Georgia or Strada Matte ranges.

CONTEMPORARY CHIC

Designed for the savvy-minded customer who's looking for cutting-edge design matched by quality and durability, our collection of contemporary kitchens ticks all the right boxes. Built for a busy lifestyle, your contemporary kitchen will work hard yet remain looking just as good as the day you bought it.

STRADA GLOSS *Graphite & Porcelain*

Making the ultimate contemporary style statement with handleless doors and drawer fronts, Strada is a high quality product with an exceptionally flawless, mirror-like finish.

TAVOLA Hacienda Black*

DESIGNER TOUCHES

With the use of an aluminium rail profile you can create the truly contemporary style statement of a handleless kitchen.

TAVOLA *Light Oak & Cashmere*

Tavola's true beauty lies in its simplicity. This elementary slab design is given fresh new life with added curves and a daring horizontal grain, making the quintessential contemporary style statement.

PAINT
TO ORDER

STAIN
TO ORDER

Tavola is available in 24 paint colours or 6 stain colours. Alternatively, you can use our Colour Matching Service to select a specific colour(s). Please see pages 06 to 09 for a full list of the colours available.

Painted

Stained

MIX & MATCH

The rich tones of Light Oak perfectly complement the subtle tones of Cashmere in this stunningly original colour combination.

Please note:

Tavola is manufactured with an oak veneer. Veneers are randomly selected and as a consequence each door will be different in grain structure and can have variations in colour.

WAKEFIELD *Ivory & Powder Blue*

Handle shown: K1-161

WAKEFIELD

Ivory, Lava & Stone

MIX & MATCH

When mixing colours, why stop at two?
Combining three colours works extremely well too,
so remember to try this when planning your design.

Please note: a certain amount of woodgrain will be visible through the painted surface of this door.

Handle shown: K1-86

FLORENCE

Graphite & Light Grey

The internal bead that adorns the centre panel of the Florence door lends itself perfectly to a traditional setting, with overmantle, beaded paneling and decorative brackets adding further appeal.

Florence is available in 6 paint colours.

Porcelain

Mussel

Light Grey

Stone

Dust Grey

Graphite

Handles shown: K1-168 and K1-174

FLORENCE *Light Grey*

DESIGNER TOUCHES

The inclusion of a wine rack and open shelving can transform even the most basic design into a 'grand design'.

Handle shown: K1-159

FLORENCE

Dust Grey & Porcelain

Handles shown: K1-169 and K1-172

FLORENCE *Porcelain*

MIX & MATCH

Both colours sit alongside each other in perfect harmony in this traditionally inspired design.

Handle shown: K1-151

FLORENCE

Stone & Light Grey

CREATIVE COMBINATIONS

The pairing of Stone & Light Grey provides a serene look and feel to which bold accents can be added.

Handles shown: K1-50 and K1-51

GEORGIA *Porcelain & Stone*

The Georgia door with its flawless, smooth painted finish and modern shaker-style design can be combined with an array of accessories to create the ultimate kitchen space. Overmantle, plate rack, spice rack and keystone pelmet are amongst the inspirational accessories available.

Georgia is available in 6 paint colours.

Please note: With Iona Painted there will be minimal woodgrain visible through the painted surface of the door.

Handle shown: K1-104

WINDSOR SHAKER *Oak*

Combining contemporary styling with Windsor Shaker's innovative construction and PVC surface, proves that you can easily achieve a sophisticated looking space whilst maintaining a realistic budget.

**PAINT
TO ORDER**

Windsor Shaker is available in 24 colours and Oak. Alternatively, you can use our Colour Matching Service to select a specific colour(s). Please see pages 06 to 09 for a full list of the colours available.

Painted

Oak

ADD CURVES

Maximise your cupboard space by using curved doors in your kitchen design.

Please note: The grain structure will be clearly visible on an Ivory finish and less visible on a painted finish.

Handle shown: K1-135

WINDSOR SHAKER *Mussel*

Please note: The grain structure will be clearly visible on a Mussel finish.

Handle shown: K1-135

WINDSOR SHAKER *Ivory*

MIX & MATCH

Include a painted finish, such as Powder Blue, with your Ivory door to introduce vibrancy and contrast.

Please note: The grain structure will be clearly visible on an Ivory finish and less visible on a painted finish.

Handle shown: K1-135

WINDSOR SHAKER *Biscuit & Lava*

Please note: The grain structure will be clearly visible on an Ivory finish and less visible on a painted finish.

Handle shown: K1-135

WINDSOR CLASSIC *Sage Green*

Windsor Classic Painted will surprise even the most die-hard painted timber fan with its remarkable 'ash wood-effect PVC' finish. Designed to resemble real painted timber, the grain effect remains visible through its painted layer, maintaining an authentic look and feel.

Windsor Classic is available in 24 colours. Alternatively, you can use our Colour Matching Service to select a specific colour(s). Please see pages 06 to 09 for a full list of the colours available.

Painted

Please note: The grain structure will be clearly visible on an Ivory finish and less visible on a painted finish.

Handles shown: K1-101

WINDSOR CLASSIC *Ivory*

Please note: The grain structure will be clearly visible on an Ivory finish.

Handles shown: K1-60

DANTE *Light Oak*

Featuring a large array of unique accessories, Dante's ornate detailing is highlighted here through a combination of painted finishes. Available accessories include high profiled cornice, under cornice and pilasters. When fused with quadrant and concave doors, this range provides soft edges, while Georgian-style frames and an exquisite canopy add an upmarket look and feel.

PAINT TO ORDER

Dante is available in 24 colours and Light Oak. Special finishes are also available, see page 08 for details. Alternatively, you can use our Colour Matching Service to select a specific colour(s). Please see pages 06 to 09 for a full list of the finishes available.

Painted

Light Oak

CREATIVE COMBINATIONS

Introduce a deep painted Lava finish to the rich Oak for a stunning contrast.

Please note: In this image, the knots and pips in the timber have been filled resulting in what is called a "smooth" finish. The grain of the timber will still be visible through the paint.

Handle shown: K1-101

DANTE *Brilliant White & Sage Green*

SPECIAL FINISH

This range can have a smooth, smooth distressed, character or character with distressed finish applied, if desired. See page 08 for further details.

Handle shown: K1-50 & K1-51

DANTE

Light Oak Antiqued

ADD CURVES

Use concaved and convex curved doors as a special feature of your kitchen design.

DOORS & HANDLES

finish: polished aluminium

HORIZON HANDLE K1-126
full length: 353mm
finish: polished aluminium

VICTORIA D-H ANDLE K1-69
full length: 145mm
finish: cast iron

BOW HANDLE K1-61
full length: 133mm
finish: antique brass

PULL HANDLE K1-152
full length: 232mm
finish: american copper

ROUND CUP K1-155
full length: 104mm
finish: american copper

KNOB K1-158
full length: 32mm
finish: american copper

RUST EFFECT D-HANDLE K1-DHAND-ZA
full length: 149mm
finish: rust effect

TIMBER KNOB K1-113
full length: 50mm
finish: oak

TIMBER KNOB K1-10-126
full length: 32mm
finish: oak (sanded only)

KITCHEN DOOR CARE & MAINTENANCE

With the appropriate care and maintenance our kitchen doors and components are designed to provide many years of reliable service. To help keep it in the best possible condition please follow the simple guidelines below.

INSTALLATION ADVICE

Notes for the Installer

Pre Installation:

Ensure that all new-builds or newly plastered rooms have been left to environmentally stabilise prior to the installation of new kitchen doors. Kitchen doors must not be installed into a damp, or moisture-rich environment as it will cause undesirable movement in the joints and panels of the door. A hygrometer should be used to assess conditions.

To help to minimise any potential damage to the kitchen whilst you are installing it, please read and adhere to the following instructions and recommendations.

- We would advise that you make an initial check to confirm that you have the correct quantity and sizes of fascias; you can do this by referring to the labels attached to the outer packaging.
- The fascias should be stored flat and away from the working area, Take extreme care when stacking the fascias with hinges attached to ensure that the hinges do not mark other fascias. Do not lean the fascias against one another, or against any surface without proper protection in-between.
- Ensure that you fully inspect each individual fascia prior to attaching the hinges. Claims for damage to the fascia will not be accepted after the hinges have been attached.
- Take extreme care when unpacking the fascias and do not use sharp blades to cut away the packaging.
- When attaching the hinges, place the fascia face down on a soft clean surface, ensuring that there is no grit, sawdust or other matter underneath than can damage the surface of the fascia whilst the hinges are attached. It is good practice to place a sheet of clean cardboard between the fascia and the flat surface prior to attaching the hinges.
- If the hinges are 'knock-in' type. Use a rubber mallet to knock the hinges into the fascia without using excessive force.
- Once the hinges have been attached to a door, hang the door on the unit straight away to avoid damage. Do not stack the doors with the hinges touching other doors, as this can causes scratches or marks to the other fascias.
- Do not stack the doors on their ends on any hard surface; this can cause chipping and scratching along the edge of the fascia, especially on the handle edge of ranges with an integral handle. Prior to fitting, the fascias should be stored flat, ensuring that they are not resting on any dirt or debris that may damage or mark the finish.
- You should take extreme care not to put the door down with excessive force on any edge, especially the handle edge, as this will cause crushing/impact damage on these edges.
- Take extreme care not to put the door down on any hard or rough surface such as bare concrete floors, or on any debris such as sawdust, grit or screws, as this can damage the product.
- If the fascias are attached to the carcass, then you should carefully remove the fascias by unclipping the hinges, and storing these flat in a clean safe environment away from your working area, utilising the packing materials from the units.
- Where cutting/scribing décor panels and trim, you must use a sharp quality saw blade of the appropriate grade for fine-cutting, or a suitable router. Small chips can appear along the cut-edge, and so extra care must be taken to minimise the risk of chipping. Using a blunt or inappropriate saw blade will produce a poor finish, and this will not be covered by the guarantee.
- On Painted Products - Any fine chips along the cut edge should be smoothed with a fine grade sand paper prior to fitting.
- All cut edges should be sealed against moisture ingress using a suitable water resistant sealant/adhesive prior to installation.
- All trims are supplied in long lengths and need to be cut down on site, and again it is important that this is done using the appropriate tools.
- When fitting the plinth, ensure that you check the dimensions of any adjacent appliances. On occasion, the plinth may need to be pulled forward to ensure that it clears the front of the appliance. This can be achieved by fitting blocks using off-cuts to the rear of the plinth prior to attaching the plinth clips, to step the plinth forward from its normal position.

General Care

As with all kitchen furniture the most common problems found occur as a result of excessive or prolonged exposure to heat and/or moisture. Always ensure that water is not left around sink areas as damage caused as a result is not covered by the guarantee.

Always wipe off excess moisture and be careful with extreme heat sources, such as kettles, ovens and toasters. It is recommended that these heat sources are not placed directly under wall units when they are in use; they generate a higher level of heat and moisture than is often appreciated and can quickly and easily lead to damage of the furniture.

Don't place appliances that create steam (e.g. steamer, coffee maker or kettle) underneath the cabinets so that the steam flows up against the underside of the cabinet and doors.

If using glass cleaner to clean your glass doors be careful not to damage the finish of the door and cabinet parts while cleaning. Do not spray glass cleaner directly on to the glass or cabinet parts as this may discolour the finish of your kitchen cabinets. Instead, spray a small amount of cleaner on to a lint free cloth or paper towel then wipe the glass.

Don't open the door of the dishwasher immediately after the programme has ended, as exposure to heat and the high humidity increases the risk that the door may absorb moisture and swell.

Please note that after a period of time it is quite normal for the colouring of kitchen units to mellow in colour. This is not a manufacturing fault and is as a result of exposure to light. This means that any additional parts subsequently ordered for your kitchen, or supplied as replacements may not be an exact colour match. However any additional parts supplied will also mellow over time to blend with your existing units.

The colour of doors and drawer fronts may appear mismatched in colour. This apparent mismatch is sometimes the effect of differing light conditions within your kitchen, (known as metamerism). To check your doors and fascia you should place them side by side in natural daylight for comparison.

Cleaning advice for all door types including timber, painted, foil, stainless steel & vinyl:

- Do not use wax-furniture polish, abrasive or aggressive cleaners, bleach or other hypochlorite (chlorine) based cleaners, multipurpose cleaners, dilutes, acetone, alcohol, solvent or similar products on the door, as this will damage the surface; additionally wax and polishes leave a residue build up that is difficult to remove.
- Only use a 5% soap, 95% water (liquid soap) solution, wiping with a damp (not wet) cloth, finally drying with a soft clean cloth.
- Ensure all cooking splashes are wiped immediately with a damp cloth; and dust with a soft cloth only.
- Never use any abrasive pads or abrasive cleaners of the furniture. Spills and condensation on the fascias/panels should be cleaned and dried immediately.

Timber & Veneered Doors

Cleaning: when cleaning timber doors you must follow the pattern of the grain. It is advisable to use a damp (not wet) cloth to remove fingerprints and marks, followed at once with a clean and dry soft cloth.

Moisture: excess moisture can damage a timber product - it is recommended that susceptible areas such as around the sink are thoroughly maintained and kept dry at all times.

Light: timber changes colour when exposed to light. Light, lacquered surfaces also have a certain tendency to "yellow with age" depending on the exposure to light. The species of timber and intensity of exposure will affect the rate of change. Due to this we recommend that timber samples be changed regularly.

With the appropriate care and maintenance our kitchen doors and components are designed to provide many years of reliable service. To help keep them in the best possible condition please follow these simple guidelines.

It is advised that colour change is taken into consideration when replacing or fitting new doors some time after the original kitchen has been installed.

PVC & High Gloss Finished Doors

PVC/Lacquer coated products are manufactured from the highest quality materials. Please be careful not to puncture the PVC/melamine lacquered surface of your panels. These should be kept dry in order to prevent moisture ingress.

Your gloss doors will come with a protective film over the front. You should remove this only after they are installed as the curing process continues for around 72 hours after the film is removed. This means the doors will be liable to scratching and other marks. You should avoid cleaning the doors for at least a few days to prevent any marks appearing on the surface.

You should clean the doors with a soft damp cloth and a mild detergent. Never use any harsh or abrasive cleaners as this may damage the gloss surface of the door. Normal cleaning and polishing may leave minor scratches on the surface of the door, which is quite natural.

Moisture: Periodically clean the interior and exterior surfaces of the door using a soft, damp cloth. Wipe dry all surfaces after cleaning.

Use only cleaning agents that are intended for the materials used in your kitchen. Avoid any agents that contain ammonia, alcohol, bleach or an abrasive.

If the surface of the product is exposed to any oil based substance (for example olive oil, butter, margarine or cooking oil), the spillage must be wiped away immediately to prevent staining. Grease marks caused by these oil-based products can easily be removed by use of a mild detergent, non-abrasive cleaner if used immediately after spillage has happened.

Abrasive cleaners are not recommended for this type of product. Do not expose the doors or panels to temperature in excess of 60°C (140°F) (Approximately the temperature of washing up water).

Light: If the doors are supplied with a protective film on the face they must not be directly exposed to sunlight. Once installation is complete, carefully remove the protective film from the front of the fascia. We also advise that colour change is taken

into consideration when replacing or fitting new doors some time after the original kitchen has been installed.

Painted Doors

Cleaning: it is advisable to use a damp (not wet) cloth to remove fingerprints and marks, followed at once with a clean and dry soft cloth. Any form of furniture polish or other cleaning products should be avoided.

Light: painted finishes will change colour when exposed to light - the intensity of exposure will affect the rate of change. Due to this, we recommend that painted swatches and door samples be changed regularly.

We also advise that colour change is taken into consideration when replacing or fitting new doors some time after the original kitchen has been installed.

Stained Doors

Our range of stains are protected by an application of lacquer.

Cleaning: it is advisable to use a damp (not wet) cloth to remove fingerprints and marks, followed at once with a clean and dry soft cloth.

Light: stained finishes will change colour when exposed to light - the intensity of exposure will affect the rate of change. Due to this, we recommend that stain swatches and door samples be changed regularly.

We also advise that colour change is taken into consideration when replacing or fitting new doors some time after the original kitchen has been installed.

Sanded (raw) Doors

Cleaning: sanded products are unfinished and therefore the care of these doors will depend on the type of finish applied, eg paint, stain, wax etc., see above for care guidance.

Please note your guarantee may be adversely affected if used for non general domestic environments.
